

## Full Stack Software Developer, Melbourne

### About Rosterfy

Rosterfy is the next level workforce management platform (SaaS) for people flow designed to connect individuals and communities to events and causes they are passionate about. The Rosterfy end to end solution has unrivalled functionality across volunteer and paid workforce management in delivering registrations, rostering, accreditation and training for major events, sporting federations, host cities, charities, not for profits and academic institutions across fourteen countries and close to 1M users.

Recent events powered by Rosterfy include Dubai World Expo, Super Bowl LIV, Gold Coast Commonwealth Games and ICC One Day and T20 World Cups.

### The Role

As part of the Rosterfy Development team, we are offering an initial six (6) month contract for a Full Stack Software Developer in project-based development on the Rosterfy platform supporting our global client base and collaborating with our team in each region (USA, UK and UAE). This role is a dynamic and exciting position to advance our current and new clients, partners and associates in delivering world class experiences with our team in South Melbourne.

### Tasks and Responsibilities

Software development in line with project related scope of work and requirements.  
Assist in the development of building out our own API's and integrating with third parties.  
Adhere to organization coding syntax and development life cycle.  
Assist in optimizing SQL database speed.  
Utilize SQL to inform other business units.  
Quality assurance and regression testing.  
Working closely with our client success team to troubleshoot system related queries.  
Ensure reliability and stability of data flowing into the platform and environment.

### Skills and Experience (Desired)

Minimum of five (5) years' experience in a Back-End Software developer role with experience in:

- Laravel framework
- Bootstrap GUI template
- Unix
- Coding in a team or coding to a central repository
- Developing using the Salesforce API & AppExchange
- Highly capable in PHP, Object Orientated Programming and MVC architecture
- Highly capable coding JavaScript – Vue / BootstrapVue
- Proven ability in building out API's and platform integrations.

- Desirable knowledge of Google Maps API, Mandrill Email Platform, Campaign Monitor and Twilio.
- Update HTML/CSS.
- Proven team player with strong analytical and problem-solving skills, focus on identifying and delivering solutions-based outcomes
- Background in volunteer or event management with a passion for the events, sport and entertainment industry
